## TELEGRAPHIC.

### Cause for Thanksgiving COAL STRIKE ENDED.

#### PRESIDENT'S ARBITRATION SUCCESSFUL

Winnipeg, Oct. 17.—The coal strike is settled. Secretary Root announced this morning that a common ground of agreement had been reached. The president has named a commission of six persons as an arbitration commission. The members of the strike commission are: Brig.-General John M. Wilson, E. W. Parker, of the geological survey; Judge Geo. Gray, of Delaware, E. E. Clark, of Cedar Rapids, Ia.; Thos. H. Watkins, of Scranton, Pa.; Bishop Spaulding, of Toronto, and Carroll D. Wright. It is expected the men may return to work on Saturday. President Mitchell has approved of an arbitration board to arrange the miners' grievance. The deciding convention will be held on Monday. The end of the coal strike has found Toronto city and coal dealers filling high priced contracts.

BRITISH PARLIAMENT REASSEMBLES.  
The British house of commons has re-assembled. A turbulent scene was witnessed by the Irish members.

SUSPECTED MURDER IN WINNIPEG  
Enquiries are being made into the suspicious death of B. O. Robinson, of Louisville, Ky., in a Winnipeg hotel.

WEST INDIAN VOLCANOES ACTIVE.  
West Indian volcanoes are again throwing out sand and dust.

DIFFERENTIAL TREATMENT FOR COLONIES  
The national union of the conservative association in Britain has approved preferential treatment for the colonies.

THE PREMIER RETURNS.  
Sir Wilfrid Laurier will not reach Quebec till to-night and Montreal on Sunday evening.

FOUND DEAD IN BED.  
Battleford, Oct. 17. J. A. Fraser, known as "The Admiral," was found dead in his bed at eight o'clock last night. Deceased was an ex-munited policeman, and came from Halifax. He was a widower.

GENERAL.  
Laborers marched a Winnipeg employment agent, to the police court. The Dominion will be well represented at the St. Louis exposition. Sensational evidence was given at the South Oxford election trial. Patrick McHugh, M. P., has again been sentenced to jail. The King of Spain may visit the United States. Wheat prices show a slight advance.

CROPS AND MARKETS.  
Wheat is beginning to come in somewhat freely. The Dowling mill is taking in four to five hundred bushels a day and the amount is increasing daily. The quality is extra good. No frosted wheat has been brought in yet, but some of the grain is smutty. The fear that some of the wheat had been cut too green is not borne out by results. All the wheat is coming in in excellent condition. Nearly all that has come in so far is red fife and a great deal of it will grade No. 1 hard. The price is 53c for the best and down to 50c for poor quality. No fall wheat has been brought to the mill, and it is not likely that much of it will be. The amount sown last year was small and where it grew a good return it will be used for seed. About 200 bushels was sold for seed this year. All of this was sown early in August and is reported to be looking well. The reports on last year's results are that wherever the wheat was covered with snow it came through the winter all right. But where it was bare of snow or was water soaked on low lying ground; it was killed out. The oat market has not yet developed on this side of the river. No deliveries are reported and buyers are not ready for business. The Brackman-Ker Company, of Strathcona, is reported to be receiving a considerable quantity of new oats and paying from 20c to 25c, the latter price for milling quality. Threshers are running uninterruptedly and good progress has been made. The returns are somewhat disappointing as to quantity, especially in oats, but the sample of both oats and wheat cannot be excelled. Malcolm Galtbraith of two bushel sack of oats from the threshers which turned the scale at 84 pounds.

Fine weather continues, and hard frosts are still in town gar-

LOCAL  
—R. Logan, of Beaver lake west, was in town on Wednesday.

—E. Kirkpatrick, of the Leland Hotel, Leduc, was in town on Wednesday.

—Mrs. W. T. Wyndham, of Pine lake, arrived in Edmonton Wednesday, on a visit to her sister, Miss Rankin.

—A. D. Osborne left on Thursday morning for a trip to Toronto, Ottawa, and points in the Eastern States.

—There was a total eclipse of the moon and the electric light plant last night and the town was in darkness.

—The premises lately occupied by K. W. MacKenzie as a book store are being refitted for a Mr. Archibald, druggist, of Nelson, B. C.

—Thanksgiving services were held in the Presbyterian, Episcopal and Methodist churches yesterday morning. The attendance was large.

—W. H. Parsons & Co. have sold their hardware business to Messrs. John Summerville & Co., who will take possession on the 1st of November.

—S. Mullett, of Sarnforth, Ont., who will manage the hardware department in Revillon Freres' new store, arrived with his wife and two children on Wednesday evening.

—Frank Tracy, who conducted the tin shop of W. H. Parsons & Co., has resigned his position and left yesterday morning to accept a similar one with J. K. Allen, of Ponoka.

—A. C. Rutherford, M. L. A., for Strathcona, and A. Driscoll, district engineer, left for Beaver lake, this morning on government business. They went by way of the base line.

—P. E. Butchart is occupying J. W. Morris' late stand in the Mullett block, while his old office is being removed and a new one built in its place. A firm of general merchants from Nelson, B. C., expect to open up about Nov. 1, in the Mullett block.

—The ladies of Holy Trinity church, Strathcona, held a very successful bazaar and tea in aid of the church funds on Thanksgiving afternoon and evening. The tea and sale took place in Ross' hall. The attendance was large and a handsome sum was realized.

—Business was suspended in town yesterday. Church services were held in the morning; and in the afternoon the combination of fine weather, good roads and a holiday was taken full advantage of for driving and shooting. Thanksgiving of 1902 was an ideal holiday.

—A. B. Campbell and A. Norquay made a trip up the river last week to Kelly's landing and returned by canoe. The river is getting low and the rapids show up very prominently. Mr. Campbell brought down samples of building stone from a quarry, which exists about 40 miles up the river.

—H. Paulin, of Vegreville, has purchased a small second hand steam threshing outfit from the Deering Implement Co. It will be refitted in first class shape and taken out to the Vermilion immediately to help thresh this year's crop. Next year the owners intend purchasing a new modern machine as it is expected a large acreage will be harvested.

—D. R. Fraser & Co. are preparing to erect a sawmill on their claim 60 miles up the river. The logs will be sawn there and the lumber rafted down to Edmonton. One of the engines from the mill here will be sent and a 100 horse power boiler is already loaded on trucks ready to start. A gang of men are now at work in the bush road making and preparing for the winter's work. This season's supply of logs are all sawn and the planer is now at work.

The Northwest government's steam ditcher is at work straightening Rai Creek, and has worked its way from the new bridge at the end of river lot 20, up to the bridge at the end of Kinsistow avenue. A number of citizens took advantage of the holiday to see the ditcher at work. As the end of the season is drawing near it did not suspend operations on the holiday. When the ditcher reaches the bridge at the end of Namayo avenue it will be turned north along the road allowance to the Sturgeon with the intention of draining Green lake and Fawcett's lake which at present obstruct that road.

—C. W. Satter, immigration agent, returned on Tuesday from a trip through the Galician settlements, fifteen miles east of Victoria. He reports a remarkable improvement in the vicinity, during the last year. When the Galicians settled there the land was not subdivided and they were in "no haste" of their section lines. Now it is staked out in quarter sections and is being rapidly improved. The buildings are made of logs, well plastered and carefully thatched. The land is being rapidly broken and put under cultivation and the Galicians have put some work on the roads, building bridges and corduroy. Harvesting is completed. The crop was good and included No. 1 wheat, flax and peas as well as oats. At present plowing is in order of the day. The Galicians seem satisfied with their new homes and are prospering.

—C. Laurendeau went to Calgary on Wednesday.

—J. B. Langlais, of Leduc, was in town on Wednesday.

—Rev. Father Dauphin returned to Hobbema on Wednesday.

—Geo. Manuel, of the Massey-Harris, went to Wetaskiwin on Wednesday.

—W. M. Haight returned Tuesday evening from a business trip down the line.

—J. Rao, is opening up "The Palm Cigar Store," in the premises lately vacated by H. Acres, V. S.

—The train from the south on Tuesday was a mixed one, but arrived at 5:30 and left Wednesday morning at 8:30.

—M. R. McNabb, sold to M. B. Timm, shoemaker, the S. E. 1-4 of 33, 53, 24 west 4th. The price paid was \$2,000.

—A scow for L. Morel, of Fort Saskatchewan, was built at Fraser's mill last week and left on Tuesday loaded with supplies.

—Ostrich Star: It is reported that small pox is raging among the Indians. Every precaution is being taken to prevent the spread of the disease.

—Rev. Gazley, of Strathcona, will preach in the Baptist church, Sunday morning. In the evening Pastor McDonald will preach on "Man's Ways and God's."

—Senator Wm. Conger, of Nebraska, who has been staying in Edmonton for the past four months, received a telegram last night announcing the death of his daughter, Mrs. D. S. Garrison, of Omaha, Neb.

—A Galician settler from near Pakan is now doing a month at hard labor in Fort Saskatchewan for ill-treating a horse, the property of another Galician. The culprit was committed by J. A. Mitchell, J. P., of Pakan.

—Walter Armstrong, of the Armstrong brothers, Edmonton, who enlisted in the Fourth contingent at Rossland, has been notified that he is entitled to 160 acres of British Columbia land, granted by the government of that province to its South African volunteers.

—Regina Leader: Homestead entries at the Regina lands office in June, July and August totalled 1,394, as against 370 for the same months in 1900. For years prior to 1897 the total for each full year in all the offices did not exceed 1,800.

—An interview with W. L. Griffiths, Welsh immigration agent for the Canadian government, appears in a recent issue of the Cardiff Mail. Mr. Griffiths had visited the Patagonian Welsh colony at Yorkton, and reported all well satisfied with their locations.

—Messrs. W. Johnstone Walker, W. Ramsay and T. H. Whitelaw, M. D., returned on Monday from a pleasant outing at Beaver lake. They went by the good around the hills and returned by the base line. Chickens and partridges were numerous along the trail, and ducks were very plentiful at the lake.

—To prevent a possibility of unfortunate misunderstanding it may be well to mention that the two drivers of Lesson & Scott's stage were named Peter Campbell, and both have resided in Edmonton since the stage ceased running. P. C. Campbell (big Pete) is recently deceased, P. D. Campbell (little Pete) is alive, and well.

—Work has been begun on the hills on the base line on Stony Plain under the supervision of Geo. Sutherland as overseer. A subscription amounting to \$225 was taken up for this work in town and on the plain, and the government granted \$400. The amount will make a great difference in the road.

—R. F. Stupart, director, of Dominion meteorological service at Toronto, writes the Calgary Alberta to deny the Toronto World's report that he had said there would be no grain ripened free from frost in Alberta this season. He says: "In future, while I shall be glad to furnish reports in writing to any newspaper that may desire them, I shall decline interviews, as on several occasions there has been gross misapprehensions of my statements." The denial is accepted, when coupled with the promise not to do it again.

## J. T. BLOWEY.

TABLES that will not groan.  
CHAIRS that will seat you comfortably.  
SIDEBOARDS that will hold the reserve.  
COUCHES that will rest you.  
BEDS that will give you sweet repose.  
And all the latest possible prices.  
We buy for two large stores, and buy for spot cash, taking advantage of all that spot cash means.  
School Desks, Organs, Pianos and Sewing Machines, Carpets and Curtains.  
EDMONTON AND STRATHCONA.

OPEN FOR HOMESTEAD ENTRY.  
Plots of townships 59 and 60, range 24, west 4th meridian have been received at the land office. These townships are now open for homestead entry.

There are two settlers before survey in these townships, both of whose houses are built alongside the Athabasca trail.

John Gullion is settled on the southeast quarter of section 36 in township 59.

Newton Egge is settled on the north-east quarter of section 1 in township 60. His house is known as the "Half-way house on the Athabasca trail."

## NEW ADVERTISEMENTS.

FOR SALE.  
Cookstove for sale, coal and wood, at J. A. L. MacDougall's, Namayo Ave. 101-102.

LOST.  
On Sunday last between McDougall & Scott's store and General Hospital via land office, a Clan Tartan Carriage Knee Rest. Finder will be rewarded by leaving same at McDougall & Scott's store. 101-102.

FOR SALE.  
Three year old milking cow. Fresh on 10th August last. Price only twenty dollars to quick purchaser.

## C. P. R. EXEMPTIONS.

The recent rise in the price of C. P. R. lands brings prominently to mind the question of the twenty years exemption. Had the lands of the company been taxable at this date—as they should have been according to the bargain actually made between the people of Canada and the company in 1881—it is safe to say that no such increase in price would have been made. Because the contention that the lands properly became taxable in 1901 has been abandoned by the government the company feel safe in putting two dollars an acre on the price of their land in the choicest tract of country to be served by the Canadian Northern railway. There is no question about who will have to pay this two dollars, an acre nor where the money will have to come from in the end. It is so much more hard cash to be taken out of the soil by the labor of the settlers. Although the price of \$5 is limited to the land which will be specially benefited by the construction of the Canadian Northern railway and therefore may be considered as a slap at that company, there is an increase to \$4 for other lands, as well. As the case stands the C. P. R. is in a position to increase the price of its land beyond what any other company or individual can afford to hold for, and the \$5 increase shows its disposition to hold for the limit.

But the increased amount which will have to be paid before the land can be used is not the only probable result of the action of the railway company. It will necessarily have the effect of retarding the settlement which would render productive the land in question. The result is to retard the general expansion of the trade and general development of our country. The C. P. R. has always stood as the robber in the gate, to demand toll on all and everything passing either way. Its policy has been a policy of strangulation, not of development. If any Northwest man is asked what was the matter with his country from 1880 to 1896 he will say "Too Much C. P. R." The present action of the company shows that they are still with us, and that their policy has not changed. It was counted bad that they should have been allowed to select lands hundreds of miles from where their railway ran as a part of their land grant. It was bad. And it is the natural outgrowth of that privilege, and policy in exercising it, that the land furthest from railway communication is now put up to \$5, while that nearer existing railways is only put up to \$4.

It is to be regretted that the government of the day cannot relieve itself from responsibility in this matter. The question of the termination of the C. P. R. exemption was pressed upon their attention repeatedly. They at first refused to consider it. Afterwards they refused to deal with it. And at last they tried to shuffle out of the responsibility by a reference to the courts. So far as the facts have been developed they have absolutely refused to even submit to the courts the question of when the exemption actually expired. They have asked, or are asking, the courts, to decide whether the exemption expires twenty years after the lands were earned by the construction of the railway or twenty years after the lands were patented to the company. The lands were earned during the period between 1881 and 1886. The patents are only being issued now. As it is impossible to decide just what parcel of land was earned by what piece of railway construction it amounts to this that the courts will decide whether the C. P. R. exemption expires in 1900 or in 1921-2. It is thus seen that by abandoning the clear wording and accepted meaning of the act of parliament the government has added at least five years to the 29 years exemption already enjoyed by the company, and by failing to rest their case on the recognized intent of the act stand a good chance of extending the exemption which was specifically stated at 29 years to a total period of 45 years. There is not a word in the act to indicate nearly or remotely that the termination of the exemption depended in any way on the date upon which the lands were earned by the company. The only question was as to the date on which the lands were granted or given. There is and can be no doubt that the date of the act which made the grant or gift was the date from which the twenty years exemption was to run. That was the universal understanding in parliament and in the country at the time, and until the time nearly expired. Then and only then the

contention was set up that the word "grant" meant patent and that the exemption ran for twenty years after the patent was granted. By collusion between the late government and the company no patents were issued during the ten years which elapsed after the last of the lands were earned, and not until the present government had been five full years in power was the issue of patents begun. The suggestion of the present leader of the opposition is no better than the action of the government on this matter. He would tax the lands and repay the C. P. R. out of the general treasury. He knows very well that the big vote of Eastern Canada would not agree, to that, and he was careful not to put his suggestion to vote in parliament. It was something to talk about; to hold out to the people of the Northwest like free agricultural implements, but it was not something to risk the prospects of his party on by a vote in his house. In any case why should the C. P. R. be paid money that is not owing to them. It is the right as it is the duty of parliament and of the government to see that the rights of the people are protected in all bargains that are made. And parliament has no right to hand over millions in hard cash out of the pockets of the people of the Northwest, or out of the general treasury, either, by allowing a company the advantage of what is admittedly a quibble on a word.

## THE ATTITUDE OF THE C. & E.

The interview with A. M. Nanton, of the Calgary and Edmonton railway, in reference to the opposition of that company to the making of the C. N. R. junction south of Strathcona, which appears in the Winnipeg Free Press, is quite interesting, not to say remarkable, when read with local knowledge of the facts. Mr. Nanton is anxious that the public, especially the people of Edmonton, should know that the C. & E. only wanted the C. N. R. to enter into the usual agreement as to maintenance of the junction. It is one of the most remarkable coincidences on record that although the C. & E. had according to bland Mr. Nanton, been attempting to reach an agreement with the C. N. R. since April last as to this operation, an agreement was not arrived at on the day the junction was made, at the very time the C. & E. was doing its possible with the active aid of the C. P. R. to prevent its being made. Mr. Nanton's explanation comes too late. It does not account for the show of force made by the C. P. R. people here in defiance of the order of the railway committee of the privy council. The C. P. R. made up the train specially for the purpose of preventing the connection and manned it with all the force they could command from amongst their employees in the Strathcona yards. Had it not been for the counter demonstration of force in the afternoon there is no doubt that the C. N. R. gang would have been driven away from their work of putting in the junction when the guard train returned from the Y after the regular had passed. Had they been within their rights they no doubt would have stood on their rights. But they knew that they were defying higher authority, and deliberately dared to do it, expecting to get away with it, until the counter demonstration of illegal force brought them to their senses.

It is very unpleasant that there should be such occurrences as that of Wednesday, the 8th. But the blame for them should be placed on the proper shoulders. The C. N. R. would not have attempted to make the junction, nor would the public have been prepared to back them, using force against force, had the C. & E. and C. P. R. not been taking undue advantage of their position in defiance of law.

The action of the C. & E. in the matter of the junction throws a strong light on the attitude of that company and the C. P. R. on the question of the spur. Although it will ultimately be a part of a competing system, at present it is merely a spur from the C. & E. whose operation would be of the greatest advantage to the people whose travel and traffic give the C. & E. the largest part of its business. Had that company had any idea of inconveniencing the public or aiding the advancement of the country they would have built the spur themselves years ago. Surely, any one would say, if such a spur were built and they were offered the privilege of operating it without rental, and making their own rates, their own interests would cause them to undertake its operation. But the spur has been built, and they have been offered the use of it rent free, if they would only operate it, and they have refused. No question they are within their rights in refusing. They did not build the spur, they did not ask to have it built, they did not want it built; and they have therefore a perfect right to say: "Let those who built it operate it." At the same time it can only be operated by the owners presumably at a loss, and without the public receiving that convenience of service which its operation as a part of the C. & E. would give. If operated by the C. & E. besides being of the greatest convenience to the public it would be profitable directly and indirectly to that company. The C. & E. might be supposed to owe the public something. But leaving that to one side the facts are stated not in the expectation that the C. & E. will adapt themselves to the public convenience, but so that the public shall understand that their position in regard to operation of the spur is simply that of dog in the manger, as in the case of the junction. They had no right to prevent the junction; they could not ultimately and absolutely prevent it but they would prevent it as much and as long as they could by any means they could. And then when their means failed they try to make the public believe that their obstruction was the fault of the other party to the transaction. That little episode of the guard train lets us know just where the C. & E. stands on the question of the operation of the extension to Edmonton and just what we may expect from them.

## SCRIP CLAIMS.

H. A. Conroy will visit Lac la Biche, leaving Edmonton about Nov. 20th, to take any evidence in support of scrip claims that may be offered there. He will then proceed to the Athabasca Landing, Wabiscaw, Whitefish Lake and Lesser Slave Lake. At these latter points Mr. Conroy will pay treaty and at the same time will hear evidence as to scrip claims.

## PEACE RIVER MAIL.

A mail will leave Athabasca Landing for Lesser Slave Lake and Peace River Crossing on November 1st. Two more mails will go in during the winter. One in the latter end of January and the other in the latter end of March.

Packing House East Edmonton. Retail Stores Edmonton and Strathcona.

### Timber of Homesteaders.

For the information of the many new settlers in the district the regulations regarding timber for homesteaders are published below.

Any occupant of a homestead quarter section having no timber of his own suitable for the purposes hereunder mentioned, may, providing he has not previously obtained a free allowance of timber, obtain a permit to cut such quantity of building timber, fencing timber or fuel as he may require for use on the land he owns and occupies, not exceeding the following:

(a) 3,000 lineal feet of building timber, no log to be over 12 inches at the butt end, unless the timber is cut from dry trees, in which case timber of any diameter may be taken.

Should the building timber be sawn at a mill the permittee will be entitled to receive free of duty 9,250 feet, board measure, of lumber therefrom and no more.

(b) 400 roof poles to be used for each purpose.

(c) 500 fence posts, 7 feet long and not to exceed 5 inches at the small end.

(d) 2,000 fence rails.

Any settler in Manitoba or the Northwest Territories, who has lost his dwelling or other buildings by accidental fire, whether caused by prairie or bush fires, or in any other way not due to his own carelessness may obtain a free permit to cut for the replacing such buildings the quantity of timber to which a homesteader is entitled free of duty under the provisions of this section of the regulation.

Should the house timber be sawn at a mill payments for sawing must not be made by way of toll, as the full quantity of lumber cut from the logs must be used on the permit holder's homestead.

In order that mill owners may be able to give satisfactory evidence that saw logs or lumber found in their possession have been lawfully cut, they shall require from settlers bringing timber to be sawn, proof that the same has not been cut on Dominion lands, or that it has been cut under a permit, which the settler should produce in order that its number, its date, and the name of the permittee may be noted by the mill owner. The latter should also record the quantity of such timber sawn by him, so that he may be in a position to fully protect himself should an account or return thereof be demanded by agents of the department.

The applicant will require to pay an office fee of twenty-five cents before he can obtain a permit, but no dues will be charged for the timber or wood cut under and in accordance therewith.

Homesteaders and all bona fide settlers whose farms may not have heretofore a supply of timber, or who are in possession of wood lots or other timbered lands, will be granted a free permit to take and cut dry timber for their own use on their farms for fuel and fencing.

Cases in which a homesteader can sell timber off his own homestead.

The Dominion lands act provides that a homesteader may cut and sell timber off his own homestead provided he sells the same to actual settlers for their own use on their homesteads.

Further it also provides that a homesteader may sell timber off his land to other than actual settlers provided he is actually clearing the land upon which the timber is cut for cultivation purposes in the immediate future. In case the homesteader is clearing the land for cultivation purposes in the immediate future the homesteader should make application to the crown timber agent who will grant a permit to cut the timber on payment of an office fee of 25 cents. In securing a permit of this kind the homesteader will be obliged to take an affidavit when returning the permit to the agent to the effect that all timber cut under it has been taken from the tract which he is clearing for cultivation purposes in the immediate future.

A homesteader is entitled to use the timber on his own place without a permit as long as it is used to improve his own land and is not bartered or sold except as stated above.

The various railway companies having terminated the arrangements under which the agents of Dominion lands were allowed to issue permits on vacant railway lands as well as vacant Dominion lands, free permits are no longer issued to purchasers of railway lands on vacant Dominion lands, unless these purchasers are homesteaders also.

Homesteaders whether they have received their patent or not are now allowed to get the balance of their homesteaders allowance on application at the land office.

Timber Permits on School Lands. Permits to cut timber upon school lands may be granted in the discretion of the minister of the interior, who, before authorizing the issue of permits to cut upon any section or portion thereof, shall cause the same to be carefully examined, and shall satisfy himself that the removal of the timber will not impair the value of the land when offered for sale.

Persons Exempted From Dues. No dues are to be exacted from the following classes of persons for timber cut upon unoccupied of Dominion lands; that is to say:

(a) Miners engaged in prospecting

when holding free miner's certificates.

(b) Travellers.

(c) Persons engaged in merely scientific pursuits or exploring.

(d) For timber cut for the construction of public works, public institutions and the buildings in connection therewith. The quantity of timber to be taken under permit free of duty to be determined by the minister of the interior, who shall also prescribe the territory within which it shall be cut and by whom.

### Railway Earnings.

**Railway & Shipping World.**  
Calgary & Edmonton Ry.—Net earnings for July, 1922, \$5,436.75 against \$9,813.84 for July, 1921. The decrease in the net earnings is accounted for by the expenditure of \$10,734 under the head of freights. Net earnings for seven months ended July 31, 1922, \$55,579.75 against \$109,063 for same period in 1921.

Ap'pelle, Loma Lake and Saskatchewan Ry.—Net earnings for July, 1922, against \$289.94 for July, 1921. Net earnings for seven months ended July 31, 1922, \$55,069.57, against a net loss of \$12,772.77 for same period, 1921.

Canadian Northern Ry.—Approximate earnings:

	1922.	1921.	Increase.
July.	\$132,300	\$87,200	\$45,100
Aug.	130,950	97,000	33,950

\$263,250 \$184,200 \$79,050

Mileage in operation in 1922, 1,244, against 828 in 1921.

C. P. R. Earnings, Expenses, Etc. Gross earnings, working expenses, net profits, increases or decreases over 1921-02, from July 1, 1922:

	Earnings	Expenses
July.	\$3,246,626.51	\$2,670,909.26
Aug.	\$3,571,181.50	\$2,191,283.11

\$6,808,808.07 \$4,862,192.37

Net Profits \$1,946,615.70

July, Aug. \$1,177,711.26 \$79,814.32

\$1,326,901.45 \$57,269.36

\$2,578,612.71 \$137,113.68

### As to Lead Duties.

The Nelson, B. C. News discusses the demand for lead duties and the prospects of getting them from the conservative party controlled by the manufacturers' association. It says: "The Nelson board of trade's representative went before the organized manufacturers' assembly in Halifax and stated his case. He was received with small enthusiasm, and could make no headway. At a later date he discovered and revealed to others the cause. Some of the most pronounced 'protectionists' in the association use lead in the manufacture of their products. Lead, therefore, is not in need of 'protection' only the goods partly made from lead by these manufacturers call for tariff protection. Mr. R. L. Borden was evidently not aware of these facts when he undertook to say so very definitely and impressively that the 'policy of adequate protection' would be beneficial to the great lead mining industry."

### The Balfour Ministry.

London, Oct. 6, 1 c. m. (Special).—The revolt of supporters of the government against the education bill is spreading, and becoming more pronounced. Almost every day during the past week the newspapers have contained convincing evidence of this fact. Four or five prominent conservatives, who are also churchmen, have openly declared themselves hostile to the bill in its present form, but the political situation is made still more interesting by the determined stand taken against the measure by the liberal unionists in Mr. Chamberlain's camp, and though he affects to treat the matter lightly it is clear from the fact that he has summoned a private conference of his supporters to re-consider the matter cannot be dismissed with a cheap sneer at the revolting "two hundred."

### Manitoba Doves.

Free Press, A band examiner, who covers a lot of ground each year in this province, has remarked on the increase of doves in the vicinity of Netley creek. A few years ago, these birds did not fall under his notice. The description of the bird that he gives is that it is of a clay color, about the size of a turtle dove. Also, they are very thick around St. Eustache, about thirty-five miles away. These are not to be confused with the wild pigeon, which visits us no more. Of course, pigeons are of the dove family, but no one seems to molest these doves. They are very tame, and sit on the fence by the roadside, not only in the localities named above, but also on the trail from Headingly to St. Francois Xavier. The traveler never ate a dove pie, or heard of anyone shooting them for food, although identically the same feeling prevails in the Midland counties in England. No sportsman thinks of shooting a dove, but a wood pigeon is "banged" at a distance of a few years since these doves were not in the localities named, but have been increasing very rapidly within the last few years, since they were first noticed.

## The Manitoba Tragedy.

The terrible shooting tragedy at Alton, in the Menominee settlement in southern Manitoba, is described in the Winnipeg Telegram. The shooting took place on Oct. 9th. The murderer is the teacher of the local school. His name is Henry L. Toews, 38 years of age, a native of Germany on the Russian border. There had been complaints regarding him for some time, on the day of the shooting he was asked by the trustees to meet them in the house of one of them, Abraham Rempel, which was only a few yards from the school. Toews left the school at their desks and went across to attend the meeting of the trustees.

John Hiebert, Abraham Rempel and Peter Kehler, members of the board, were present. The discussion had scarcely started when Toews, after a violent personal denunciation of the three gentlemen present, drew a revolver and opened fire.

Outside of his speech, Toews' actions were quite cool and deliberate. He took steady aim at John Hiebert, and immediately after the flash of the weapon Hiebert was writhing on the floor with a bullet in his abdomen. Then Toews turned his pistol on Abraham Rempel and Peter Kehler, who were for a moment paralyzed by his sudden action, and shot Kehler through the breast.

Kehler threw off his lethargy, dashed at the desperate man, and grappled with him. For some moments they strived to find in a deadly grip, both striving for the possession of the death dealing weapon. For a while there was no advantage, but finally Toews prevailed and Toews, wrenching the revolver free, shot at his older opponent.

The struggle had apparently unseated his nerve, for in place of his former deadly shooting the bullet flew a trifle wide of his mark and smashed into Kehler's hand, rendering that member completely useless and causing a stream of blood to flow which put the victim into a semi-conscious state.

Leaving his three victims helpless on the floor, Toews coolly straightened out his attire and deliberately proceeded to the school house.

Here his deadly animosity to the men whom he thought he had killed, was further manifested. Out of all those present he chose for the bullets of his bullets, the little daughters of the men whom he had attempted to do to death, and thus complete the desolation in the house which he had already partially wrecked.

When entering him he turned his revolver, four chambers of which were still loaded, on the little daughters of Kehler and Rempel. Kehler's little ones, 8 and 10 years of age, were first assaulted, and again his deadly marksmanship helped his purpose, for successive shots pierced their little bodies, so that they were covered with their own blood, mortally wounded.

Apparently satisfied with his work, Toews, he turned and was leaving the room when he stopped, shrinking to a corner, the 11-year-old daughter of Abraham Rempel, the man whom he had already killed. Despite her terror she never wavered from her fatherly intent, and his sixth charge of his weapon saw her lying motionless on a bed with a shattered arm.

News that left the school house, and started to work to Alton, and the nearest railway station. Apparently with the intention of boarding the train and leaving the district, the distance to the depot is about a mile, and after walking about half that distance Toews stopped and aiming the weapon on himself inflicted a wound which will prove fatal.

He was found there unconscious some time later.

## MACLEOD

October, Oct. 10.  
Cattle Line passed through Kipp on Wednesday with 150 head of beef cattle, enroute to Balise, Mont., where they will be shipped through a bond to Boston and from there to the British market.

The contract for the building of a new house here was let to Patrick A. G. of Cranbrook, this week. Mr. A. G. arrived from the west on Wednesday and after signing the contract at once made arrangements for starting work on the building which will cost in the neighborhood of \$20,000 when completed. Mr. A. G. has had considerable experience in work of this kind, having built the Cranbrook hospital and the Fincher Creek Catholic church.

Best cattle have been moving out recently from here during the past week. A. J. McLean shipped 238 on Friday, 228 on Saturday, and 117 on Thursday. H. A. Mullins 628 on Tuesday and 85 on Wednesday. Burns & Co. 51 on Wednesday. The first two shipments were cattle mostly from the Yarrow district, consisting largely of R. Dutt's and H. Hatfield's brands. Mr. Mullins' shipment included 628 Cheakone cattle, a nice even bunch, and 78 of the Bonview Cattle Co. A. J. McLean's shipment yesterday consisted of Slide-Out cattle.

Sgt. Deane of the N. W. M. P., who has been stationed at Lethbridge for some time, has been transferred to Regina.

## Britain as a Producer

and as a Market.  
In a letter entitled "Can England Feed Herself" appearing in a recent issue of the Manchester City News, the following facts regarding the climate of the British Islands are stated, which have an important bearing by comparison on the climate of the western part of the Northwest in high latitudes. A table is also given showing the average yield of wheat in the leading wheat growing countries. Russia is credited with an average of 12 bushels per acre, America with 15, Germany 20, France 20, Italy 22, Japan 26 and England 30. The writer continues:

"The reason is easily explained. We enjoy the most equable climate in Europe, as Japan does in Asia. Not only are both countries blessed with warm winter currents. In the case of England by that of the Gulf stream; in that of Japan by the Black stream. The benefit derived by Great Britain is so great that London enjoys a milder winter and a cooler summer than Paris, which is 2.42 degrees of latitude further south, and plants can be reared in the open air which must be sheltered in the greenhouses of Paris, the Shetland Isles, ten degrees farther north, have a winter temperature higher than that of London, and equal to that of London; and the myrtle flourishes as well in the north of Ireland as in Portugal. Hence our land is not only suitable for agriculture, but our climate is everything that can be desired."

In view of the immense increase in wheat production in the Canadian Northwest it is interesting to know that the total annual wheat consumption of the British Islands is 270 million bushels, of which the United States supplies 85 millions, Russia 49, millions and other countries 70 millions, while 50 millions is grown at home.

## The Fast Atlantic Line

Speaking recently in Boston, Sir Frederick Borden, minister of militia, said: "It is practically decided to establish without delay, a service beginning with twenty-knot vessels, to be granted a subsidy of \$750,000 a year from the Canadian government, and \$375,000 additional from the British government. He could not say yet whether the Canadian Pacific railway, comprising the Atlantic, Elder-Dempster and other lines would get the contract. The steamers will make their terminus, in winter, at least, at Halifax. The terminus in the United Kingdom will probably be Liverpool. The initial twenty knot service, while not as fast as the swiftest ships on the lines running from New York, will be the best for Canada under the present circumstances. This speed, he continued, is not by any means the end of what it is intended to make this service. A new fleet of ships will be built and there will be frequent sailings. The new service will be established at an early date."

## Furs.

McMillan's fur circular for October, says, "The general report is that there is a very heavy trade for manufactured furs, but manufacturers have no placed as many supplemental orders for raw furs as was expected, indicating that they had pretty large stocks on hand. Cannot advise anything definite now, except that furs will open a good deal lower than they closed at. Last season, particularly for early caught furs. We strongly urge trappers not to trap too early in the season while furs are poor quality. The only furs of much value caught between the first and the middle of November are beaver, muskrat and skunk. Muskrat Grade B, and the beaver and skunk No. 2 or B. After the middle of November it does not take much cold weather to improve the quality of mink and skunk some will grade No. 1."

## LETHBRIDGE

News, Oct. 9.  
Business transacted through the Lethbridge port of customs in September was, with one exception, the largest in the transactions of this port. Dutiable goods amounted to \$90,349; free goods, \$106,182; duty collected \$26,078.66.

The first X-ray photographs taken in town were obtained at the hospital on Monday, when the machine was successfully operated.

The champion range steer of the season was a northern Montana product marketed in Chicago a few weeks ago. He came from the Flowerer herd, weighed 2140 pounds and sold at \$6.50 or a gross price of \$138.10.

## Sugar Beets.

Cardston Star: The sugar beet industry is receiving considerable attention in Cardston and the surrounding district at the present time. Blank contract forms are being given to the farmers and they are requested to give a written guarantee that they will plant so many acres in beets providing that the railroad be brought within a reasonable distance of their crop. \$5.00 per ton will be paid for beets at the factory and the R. R. Co. guarantees to haul them from any point on the line for 25 cents a ton, which means that we realize \$4.75 per ton on the cars.

## ALBERTA'S NEW COAL TOWN.

Frank Sentinel.  
Wednesday, the Union Bank of Canada opened its doors for business here in the Bertaux block on Dominion avenue.

The first manufactured brick to be turned out in the Frank Blairmore district was made this week in the Frank brickyard, a kiln of some 25,000 bricks having just been burnt and another kiln with 50,000 bricks in it will be ready for firing by the first of next week.

The Frank & Grassy Mountain railroad is about completed. The grading is all done and all of the larger trestle bridges up and ready for the steel only a few of the smaller culverts remaining to be finished. Tracklaying is progressing satisfactorily and already half of this work has been done so that within a few days this piece of railroad should be opened for traffic and Gold Creek coal will be on the market.

This week the car problem has again caused the mine officials a little bother and the miners to lose a few shifts on account of the C. P. R. not being able to supply empty cars enough to handle the mine output. Thursday there was loaded at the mine sixteen box cars in eight hours and the mine is now in shape so that it can easily produce and load coal enough every ten hours to fill twenty box cars if they are procurable.

## Scotch Coal for Toronto.

Toronto, Oct. 11.—The city to-day closed a deal with MacLure, of Liverpool, for two thousand tons of Scotch coal at \$7.58 laid down in Toronto.

London, Oct. 11.—The mayor of Toronto has cabled an appeal to the mayor of Cardiff to induce the coal mine operators to give Canada the preference in meeting the emergency arising from the American coal strike.

N. W. M. P.

Sealed Tenders addressed to the undersigned, will be received up to noon of the 21st of October, 1902, for the supply and delivery of:

2500 Bushels Oats, approximate quantity at Fort Saskatchewan.

No paper will be paid for inserting this advertisement unless authorized.

C. CONSTANTINE, Suo.,  
Commanding G. Division  
Fort Saskatchewan, 6th Oct., 1902. 99-101c.

## NOTICE TO CREDITORS

Of Noah Ziegler, late of Spruce Grove, Alberta, Deceased.

Notice is hereby given pursuant to the order of the Honorable Mr. Justice Scott, dated at Edmonton the 30th day of September, A. D. 1902, that the creditors and others having claims against the estate of the above named Noah Ziegler, deceased, are to send in their names and addresses and full particulars of their claims (together with a statement of the securities, if any, held by them, verifying same by statutory declaration, and the names and addresses of their Advocates, if any, to the "National Trust Company, Limited," Edmonton, Administrator of the estate of the said deceased, on or before the first day of December A. D. 1902.

And take notice that after the expiration of the time aforesaid the said administrator will be at liberty to distribute the assets of the said deceased or any part thereof amongst the parties entitled thereto, having regard only to the claims of which the said administrator then has notice.

Dated at Edmonton, this 30th day of September, A. D. 1902.

MACDONALD & GRIESEBACH,  
Advocates for the Administrator.

MAIL CONTRACT.

SEALED TENDERS addressed to the Postmaster General, will be received at Ottawa until Noon, on Friday, the 21st November next, for the conveyance of His Majesty's Mails, on a proposed Contract for four years, fortnightly each way, between Lac Ste. Anne (about Lat. 54. N., Township 54, Range 3 W. of 6th Meridian) and Stony Plain, via Waboo (about Section 2, Township 52, Range 3 W. of 6th Meridian) from the 1st January next.

Printed notices containing further information as to conditions of proposed contract may be seen and blank contract may be obtained at the Post Office of Stony Plain, and the proposed offices at Lac Ste. Anne and Waboo and at the office of the Post Office Inspector.

#### THE SEWER.

The sewer system for Edmonton now under construction has its outlet at the foot of Namayo avenue. It is carried down the bank at that point and into the river.

The main sewer extends across Jasper and up Namayo to the corner of East Fifth street. This sewer is of brick, two layers, oval shaped, 18x27 inches inside. All the other sewers are tile of from eight to twelve inches diameter.

From the corner of East Fifth the sewer is continued with the north on Namayo to the corner of East Seventh.

On East Fifth it is carried east from Namayo to the town limits.

On Jasper it is carried east to the N. W. M. Police barracks.

On Kinsling it extends from Jasper to the corner of Second.

On Jasper it is carried west from Namayo to the corner of West Fourth.

The tile is twelve inch, and from Namayo to midway between Queen's and McDougall there is an extra pipe or storm sewer to take the flow from that part of the street.

On West Second it extends from Jasper to Victoria.

On West Third from Jasper to Victoria.

On West Fourth from Jasper to McKay.

On West Fifth from Victoria to McKay.

On West Sixth from Victoria to Jasper.

On Victoria it extends from West Third to West Sixth.

From Namayo at the corner of East Fourth it extends on Fourth to Queen's; south on Queen's to May; west on May to Howard.

On McDougall it extends from May to Rice.

On Elizabeth from McDougall to West First.

On Rice it extends from McDougall to Howard.

On Howard from Rice to Jasper.

On Fraser from Jasper to the fire hall.

At certain of the sewer ends automatic flush tanks are placed which are connected with the waterworks. These tanks are so arranged that they are filled gradually from the waterworks, and when they are full discharge suddenly clearing the sewers. They can be arranged to discharge as frequently as may be thought desirable.

#### A CO. JOKER.

Prof. Tyndall Richardson gave a very clever and interesting performance in Robertson Hall on Friday evening to an audience much smaller than the merits of the show deserved. The professor is of pleasing appearance and gentlemanly and unassuming manner, and his tricks are the most difficult. In one he tied his assistant in a large room with the full view of the audience and with the help of several from the audience, a key belonging to one of the spectators was placed in the sack with the assistant. The curtain was let down and in less than a minute the assistant appeared before the curtain with the sack in his hand still tied and unbroken and with the key still in it. In another the assistant was tied hand and foot in a chair and to a stake. He was then enclosed in a square curtained space. The floor could be seen under the bottom of the curtain. A slate was placed on his knees and the curtain drawn closed. The curtain was opened in a moment or two and a name was shown to have been written with chalk on the slate. A tambourine, a bill and other articles were then placed in the assistant's lap and the curtain closed. At once the tambourine rattled, the bell rang and then both were thrown out over the curtain. The curtain was drawn back and again the assistant was shown seated and tied as securely as before. Finally tobacco, cigarette papers and matches were handed to a spectator on the stage, and placed on the knee of the assistant, still tied hand and foot. The curtain was drawn closed and before the spectator could reach his cigarette the light of the match could be seen through the curtain as it was being touched to the already completed cigarette held in the mouth of the assistant, who was tied. At the report of a pistol fired from within the curtain the curtain was drawn back and there sat the assistant solemn as an owl, still tied hand and foot, calmly smoking his cigarette. This trick played years ago, in various forms, was the foundation of the doctrine of spiritualism. Prof. Richardson affects no air of mystery. He simply does the tricks, and does them well.

#### South African Trade.

The Canadian commissioner, Mr. Jardine, quotes the wholesale prices of foodstuffs in the Transvaal as follows: Canadian cheese, 13 3/4 per pound; imported butter 23 to 24 per dozen pound tins; canned salmon, 105 1/2 per dozen pound tins; lobsters, 13 1/2 to 24 per doz. lb. tins; chickens, 65 each. Timber is very scarce, being in many cases unavailable. Deals, 20 feet and over, are quoted at 15 per foot.

Mr. Jardine has succeeded in securing for shipment by the first direct steamer from Canada sample consignments of butter, cheese, canned goods and 100 barrels of apples for the South African trade.

#### ELECTRIC LIGHT.

Not the least desirable feature of the town's scheme of combined water and light supply is the improvement in lighting which it promises. The late electric light company was always contending with the difficulty of lack of adequate capital; which was accentuated by the continual demand for lights beyond the capacity of the power which the financial resources of the company enabled it to supply. There has consequently been continual complaint of the quality of light supplied, and the danger of shut down from various causes. Under the combined system now being installed it is contemplated that under ordinary circumstances the water supply will be pumped into the water tower during the day time, leaving the full steam raising capacity of the boilers for the electric light. There will be installed two new Mumford boilers made by the Robb Engineering works of Amherst, Nova Scotia. These boilers are each 18 feet long, and five feet seven inches diameter. They will carry steam at 125 pounds pressure. These will give steam to a 350 horse engine, and this will run new dynamo supplied by the Canadian general electric company, which will carry 3,000 16 candle power lights. The two boilers in present use with the 120 horse engine and dynamo will also be installed in the new power house, as an alternative or a reserve. As soon as the new power is installed the light system will be connected with it, so that there will be no break in the service. The old boilers will then be moved to the new power house. The present plant is carrying more lights than its proper capacity, and it is impossible for more lights to be given until the new plant is installed. As soon as it is installed, however, there will be no difficulty about lights as the capacity of the plant is considerably beyond the prospective demand. The abundance of power will also ensure a good light, and there will be less danger of a shut down.

#### HOTEL ARRIVALS.

Monday.  
Queen's—A. E. Dunn, R. V. Gilpin, Cranbrook, B. C.; B. C. Gilpin, Gorrie, Ont.; R. H. Sargent, D. A. McLaren, Birch Lake; John H. Kennedy, Fort Saskatchewan; S. Urbany, Carroll, Ia.; J. V. Ruddy, D. Ruddy, Wellwood, Man.; Jas. L. Wilson, Renfrew, Ont.; A. Wilson, Beaver Lake; H. Carscadden, Fort Saskatchewan.

#### Trade with Australia.

A Free Press, Ottawa, despatches says: "The department of trade and commerce received this morning a telegram from Mr. Lorke, trade commissioner in Australia, stating that frozen hogs are selling at from 14 to 16 cents, duty free. This is regarded as a very good price, which Canadians who have hogs to sell may take advantage of. A report has been received at the department from Mr. Lorke by mail. In this report he says that butter has gone down to a figure that prohibits imports from Canada, and the grain market is in no mood for ordering for future delivery just now, although there is no lowering in the prices. He does not think the harvest will yield sufficient wheat to meet the home demand."

Lieut.-Governorship of Quebec.

Ottawa, Ont., Oct. 7.—The Lieutenant-Governorship of Quebec will be vacant on February 2nd, next, Sir Louis Jettie's term expiring on that date. Mr. Turle's name has been connected with this post more than once. If it does not go to him, however, your correspondent hears it may be offered to Sir Alphonse Pelletier, of Quebec. The latter has been in parliament since 1869, serving eight years in the commons and since 1877 in the upper chamber. He is a leader in the legal profession in Quebec. He has had an honorable career in law, militia and politics. He was minister of agriculture in the last year of the Mackenzie administration, and speaker of the senate in last parliament.

#### FARM HANDS.

Mr. Robert Adamson, of the Immigration Branch of the Department of the Interior, is on his way to Scotland for the purpose of bringing a number of experienced farm hands who will enter into a year's engagement at \$200 wages, and board and lodging. These men will be carefully selected by Mr. Adamson, and are expected to arrive about the 22nd of December.

Any farmer desiring to secure one of these men should make application in writing to the undersigned accompanied by \$25 on account of passage-money for each man, which sum will be deducted from the first three months' wages. All applications should reach the undersigned not later than the first week in November.

J. OBED SMITH,  
Commissioner of Immigration,  
Winnipeg, Man.

#### Lisgar Election Trial.

Manitoba, Oct. 7.—The trial of the Lisgar election petition for the purpose of unseating Stewart, the sitting member, was opened here this afternoon before Chief Justice Kilham and Judge Dubuc. A large number of witnesses are on hand also the lawyers, Messrs. C. P. Wilson and Haney for the petitioners, and H. M. Howell, for the respondent.

Stewart was examined yesterday before Prothonotary Walker for discovery.

#### The Alberta Land Company

Has 20,000 acres of as fine land as can be selected in Beaver Lake, Vermillion and Birch Lake country.

These lands are adapted to both raising grain and stock. There are three lines of proposed Railroads running through this part of the country. These lands can never be bought cheaper than now. We are selling every day and they are not going to last long. Improve the opportunity and place your money where you are sure of securing a good profit by the investment.

Many invest in Mining, some in Oil, some in Bonds; only a few reach the goal; the rest find their hard earned money gone with only a piece of nice paper to tell the story. Why not buy a piece of land one-half mile [ ] to look at and see it increase from year to year in value until it makes you and yours a nice little fortune? It will surely come. It is only a question of time.

We solicit your trade. Call or write and get maps and information of these cheap lands.

Edmonton, Alberta

**THE GALLAGHER-HULL PORK PACKING CO.**  
The Gallagher-Hull Pork Packing Co. conduct an industry at their establishment in the flat on the south side of the river opposite Fraser's saw mill, that is but seldom recognized as of such importance as the amount of business transacted there warrants.

Here is found a ready market all the year round where the farmer and rancher receive the top price for their hogs, cattle, and sheep. The work of the plant begins when the live stock is delivered at the yards and is completed when the output is packed for shipment in the various forms of pickled and cured meats, sausages, lard, tallow, soap grease, oil, hides or wool.

The main building with its additions consists of a finishing room 50x30 feet, 2 cold storage rooms each 35 feet square, 2 salting rooms in the basement, each 50x30 feet, a hog slaughtering and dressing room, 80x30 feet, a lard room upstairs, a sausage drying room upstairs, a smoke room, a sausage kitchen 15x25 feet and an engine room 12x15 feet.

Pork packing is the chief industry of the place, though cattle and sheep are slaughtered in large numbers. The hogs are weighed when delivered. The scales beside the main building, and scales beside the farmer's wagon into the pen at the rear. When ready for slaughter they are driven up a gangway into a small pen. One by one they are taken from this pen and made fast by one leg to an overhead pulley which draws them to the killing room. After they are killed they are drawn by the same pulley to the scalding vats where they are dipped, and then dumped out on a scraping table to have the bristles removed. While on the table they are washed off by a stream of water from an overhead pipe, and thence run into the dressing room. This room is arranged with rods fastened to the ceiling on which to hang the carcasses. The pulleys are run from the slaughter house onto any rod desired by means of switches.

The carcass is then cut up and distributed to the various rooms designed for each part. The system is excellent and combines facilities for speedy handling, with provision for making use of as much of the carcass as possible, there being practically no waste.

The bulk of the meat goes to the salting and smoking rooms to be cured, unless it is put in the cold storage room and kept fresh, or "sweet pickled," as it is called. In this case it must be shipped in cold storage cars.

The fat is taken to the lard pots and melted down. There are now two large pots in use and two more will shortly be installed. The lard is packed in 25 lb. pails, or in smaller pails which are in turn packed in 60 lb. cases for shipment. Large quantities of lard are usually kept on hand in the cold storage rooms.

The sausage kitchen contains an industry of itself. The machinery is all run by steam. Dried sausage is shipped out by the car, and one dealer in Victoria, who purchased a car load this summer, states that it is the best he has yet received from any Canadian manufacturer.

Large vats, heated by steam pipes, are used to boil the heads and feet for lard cheese.

A large refining pot is used to extract the grease from the bones, ears and scrap pieces of meat, so that nothing will be lost. This grease is used in soap making, and the new firm about to open up a soap factory in the tannery building at the end of the bridge, have purchased all the grease on hand, amounting to several tons. The bones, when emptied from the refining vat, are crumbled to dust and make the best of land fertilizer. As yet no one has apparently needed a fertilizer and they are not put to any use. Another refining tank double the size of the present one, will shortly be added.

The engine used of 16 horse power but the boiler capacity is 35 horse power. The machinery throughout is run by steam. The rooms are fitted with hot and cold water, and steam pipes. A 25 light dynamo lights the entire plant. The best of fire protection is at hand, water being supplied from a spring and tank on the hill to the rear. A stream of water can be thrown over the top of the flag staff on the main building. Only last week what might have been a serious fire was quenched by this means.

The slaughtering house for cattle and sheep is 20x60 feet and is also arranged to simplify the work. Two additions each 25x15 feet are built, one for a cow-lie room and the other for sheepskins, where they are dressed for shipping.

From the cattle's feet is made the "Pure Neatfoot Oil," which is put up in bottles and sold for use in finishing leather.

Close at hand is a second smoke house and an ice house 30x60 feet. A stable 50x60 feet with hay loft overhead adjoins the yards.

A short distance to the east is the foreman's house and a tenement house for workmen.

The grounds and pasture fields now include over 100 acres, 35 acres having recently been purchased at the west end of the lot, bringing it up almost to P. Anderson & Co's brickyard. This part will be cleared of the timber standing on it, broken and seeded to pasture. The lot extends south to the top of the hill. The plant supplies its own coal from a mine in this hillside. A four foot seam was worked last winter, and a second mine is just being opened. A sand pit has also recently been opened. A 12 foot seam of splendid building sand is easily available.

Closely to the foot of the hill a new stable is being built. It is 100x30 feet with spacious lofts overhead for hay and grain. It is the intention of the firm to winter a number of cattle and have them fat for spring butchering. The stable will hold 200 head of cattle and a corral 100 feet square will be attached.

This winter, however, it will be used as a sheep fold. They have purchased from W. R. Hull, of Calgary, his flock of 2,000 sheep which will be brought up next week. This flock includes 1,000 breeding ewes, and 29 thoroughbred Shropshire rams which were valued at \$22 each when lambs. About 25 of the ewes are thoroughbred also. The flock will be wintered and offered for sale to farmers, or if not sold, fattened and killed.

It is expected that about five tons of hay and 100 bushels of oats daily will be fed to the sheep alone, so that the hay and oat demand of the firm will be no small one. Large quantities of hay are being stacked at present for the cattle. About 200 lambs were raised this year, on the premises.

From 10 to 25 hands are employed the year round. At present 25 is the number. A fair day's work will slaughter 200 hogs or 30 cattle. If, however, there should be brought in a larger amount of stock more hands are put on and it is readily disposed of. As high as 500 hogs can be disposed of in a day, should there arise occasion for it.

A great advantage of this enterprise is that it is always going. No matter how cold or how warm the weather, the work can be done just the same and the market is kept open all the year round. This certainly is a great boon to the stock raisers of the country. The produce is being continually shipped out. Last week a car of bacon was sent to Winnipeg. The firm also has retail shops in Edmonton and Strathcona.

The plant and premises are being continually enlarged and improved. Mr. Gallagher states that the meat packing industry has proved itself a success in Alberta and cannot fail to develop rapidly as the country is so well adapted to mixed farming; and wherever the produce is shipped it is favorably received.

## For Sale.

The following is being offered for sale:  
One 60 H. P. Leonard boiler.  
47 ft. steel smoke stack, 28 inch.  
2 boiler feed pumps.  
One 1-inch Metropolitan injector.  
45 3-inch boiler flues, 11 ft. long.  
Full particulars can be obtained at Town Office, and articles inspected at electric light station.

By Order

GEORGE J. KINNAIRD,  
Secretary-Treasurer,  
Town of Edmonton.

Real Estate Agent, Edmonton

Office 1 door east of Postoffice.

### COAL AND THE STRIKE.

In a scare article in a recent issue the Montreal Star calls upon the government to do something to avert a coal famine in Eastern Canada during the coming winter. The article clearly points to a removal of the duty on British coal as a means to that end. No doubt the government would be more than justified in removing the duty, if indeed such a duty should ever have been imposed, but what about the protection of Canadian industry,—the coal mining industry for instance,—if the coal duty is removed. It would be nice for the leader of the opposition to speak out on that subject, right now that he is preaching "adequate" protection to all Canadian industries. A doctrine which the Star has always strongly supported. A declaration from the hon. the minister of public works would also be most appropriate. The manufacturers' association which recently met in Halifax and resolved so strongly in favor of protecting Canadian industry would be much appreciated.

But aside from politics it is not preposterous that Winnipeg and Montreal should be talking about a coal famine because mines in Pennsylvania have been closed by a strike. Montreal is looking for relief along the Atlantic while illimitable coal deposits are being worked in Nova Scotia, scarcely further from Montreal by deep water navigation than the Pennsylvania fields are by rail. And Winnipeg is not half as far from Alberta coal mines as it is from Pennsylvania. The matter with Canada is there is too much "can't" in this country. Because Pennsylvania enterprise has pushed Pennsylvania coal into Ontario and Quebec, against and over all obstacles the coal fields of Nova Scotia which are far more easily accessible might as well not exist for those provinces. And because of the same enterprise Pennsylvania coal supplies the provinces of Manitoba, while Alberta mines are shut down for half the year and her coal fields undeveloped for lack of a market. How is it that the deep waterway of the St. Lawrence cannot compete with the all rail haul from Wilkesbarre to Montreal; when the rail haul from Lethbridge to Winnipeg cannot compete with the much longer lake and rail haul from the Susquehanna Valley to Winnipeg? There is nothing wrong with Canadian industry, or Canadian skill, nor is there any shortage of Canadian capital. But the effect of the present coal strike shows that there is a grievous shortage of Canadian enterprise. It is to be hoped that the great strike will awaken Canadians to the natural resources of their own country and the need of developing those resources by their own enterprise.

### AT THE RIFLE RANGES.

Yesterday a number of riflemen took advantage of the holiday to attend the completion of the class firing at the ranges. There were also two matches held, a Merchants' Match (handicap) and sweepstakes. The weather was fine and an enjoyable day was spent in the flat. The winners in the matches were:

Merchants' Match (handicap).

1. Forbes.
2. Moller.
3. Pearce.
4. Till.
5. Spratt.
6. Haddock.
7. Groat.
8. McInnis.
9. Fisher.

Sweepstakes.

1. Moller.
2. Spratt.
3. Forbes.
4. Pearce.
5. Till.
6. Whitelaw.

Forbes was successful in holding the Hudson's Bay Cup, challenged by Spratt. Should he be challenged again and win it becomes his permanent possession.

Sunday	49	26
Monday	49	32
Tuesday	62	39
Wednesday	59	41
Thursday	55	32
Friday	52	33

Precipitation .25 of an inch.

### P. C. CAMPBELL DEAD.

P. C. Campbell, of Campbell & Reid, drymen, died on Wednesday morning, Oct. 15th, after a short illness. Mr. Campbell was very well known in Edmonton, having been identified with the place since the early 80's. He drove Leeson & Scott's stage between Calgary & Edmonton, for a number of years, and when the railway put the stage out of business he took up his residence in Edmonton. He was born in the county of Elgin, Ont., and was 37 years of age at his death. He was unmarried. His relatives in the County of Elgin were communicated with by wire and instructions were received to send the body home. Deceased was a member of the Ancient Order of Foresters, and that order took charge of the funeral arrangements. The body was embalmed at the undertaking rooms of McIntosh & Whitelaw, and a short service was held there on Thursday morning by Rev. D. G. McQueen. The following officers of the Ancient Order of Foresters accompanied the body to the station: A. H. Griesbach, R. Stewart, J. Umbach, C. Clark, H. Aldridge, C. Sutherland, R. Kenneth and J. Robertson. J. W. Reid, partner of the deceased, W. R. West, an old friend, and Rev. Mr. McQueen, also attended at the station. Deceased was a member of the Moosehose in which order he carried life insurance. He was a picture of health and strength, was well known and well liked, and his untimely death came as a shock to his large circle of acquaintances in town and country.

### THE C. N. R. SURVEY.

Star, Oct. 17.  
McFarlane's C. N. R. survey party are reported to be on the plains east of the Beaver Hills, about six miles southeast of Star. It is thought they will cross Beaver Creek about there.

### SUPREME COURT.

The sitting of the supreme court was resumed on Tuesday morning before his honor Judge Scott. There are in all some 18 larger, 35 smaller civil cases and 12 criminal cases to be heard.

On Tuesday the case of Stinson vs. Hamilton was heard. The plaintiff, Fred S. Stinson, of Calgary, brought action against the defendant, Frank Hamilton, claiming \$1,100 on a mortgage and \$700 arrears of rent. The defendant, without denying some indebtedness to the plaintiff, contended that both claims were unjust and accounts and inquiries had to be taken to ascertain the amount. The evidence of both plaintiff and defendant were heard and judgment reserved. MacDonald & Griesbach appeared for the defendant and J. C. F. Bown for the plaintiff.

The Russian church case was then taken up and will be continued the remainder of the week.

### STRAWBERRIES IN OCTOBER.

H. A. Carruthers, of the Stony Plain Indian agency, left in the Bulletin office to-day a wild strawberry plant which he dug up in the open prairie at Stony Plain yesterday, Oct. 16th. The plant is bearing four fine ripe berries besides many blossoms and berries just forming.

Huns. Brown brought in a wild strawberry vine from White Whale lake on Wednesday last which had ripe berries, green berries and blossoms on it.

There is reported to be a good crop of wild strawberries now ripening about White Whale lake.

### HOTEL ARRIVALS.

Wednesday.  
Queen's—W. J. Jackman, H. Jackman, Agricola; C. F. Stewart, Fort Saskatchewan; T. Goldie, St. Albert; D. Macpherson, C. Cecil Hubert, Winnipeg; A. H. Bouchier, Innisfail.

Alberta—E. L. English, A. M. R. Markley, H. A. Dunn, Calgary; C. W. Woodland, Toronto; F. J. Twilley, town.

Grandview—S. G. Drushel, H. H. Drushel, Mt. Hope, Ohio; D. McCulloch, Hillsburg, Ohio; Rev. J. G. Wace, New Lunnion; E. D. Angell, Fargo, N. D.; C. W. Dispen, New Brunswick; M. D. Gurney, W. Gurney, New Lunnion; M. D. Alexander, Watertown, S. D.; E. M. Alexander, St. Paul, Minn.

Jasper—Mrs. Baldwin and child, D. Stevens, town; H. Powell.

### LOCAL

—Train on time.

—Mrs. Geo. Roy went to Wetaskiwin this morning.

—E. R. Walker and wife, of Ponoka, came in on last night's train.

—W. S. Robertson returned last night from a trip down the line.

—There was no meeting of the council Wednesday evening. The date has not yet been set.

—Many local sportsmen went out of town hunting yesterday. They report game scarce within a few miles of town and very wild.

—Forbes & Royal, real estate and insurance agents, have dissolved partnership. The business will be continued by J. F. Forbes, in the old stand.

—A fracture in the crank shaft of the engine in the electric power house will necessitate the shutting off of the lights for about a week. The break will be repaired as rapidly as possible.

—A. E. Potter, conducted a successful sale of farm stock and effects at the Edmonton auction house, Wednesday afternoon. The property sold belonged to Wm. Treskow, a farmer, north of town, who is retiring.

—Neepawa Press asks of Mr. Borden: "Can he frame a tariff that will produce a revenue sufficient to meet the requirements of a progressive government, and afford more protection to Canadian industry than the present tariff affords, without imposing heavier taxes on the farmers of Manitoba?"

—A very successful social was held in the Baptist church last evening by the Baptist Young People's Union. A programme of music, songs and recitations was rendered. Refreshments were served. A large number attended and an enjoyable evening was spent.

—A Free Press despatch from Port Arthur says: Mrs. Jas. Meek died this morning after an illness of two years. Mrs. Meek, previous to her illness, was prominent in woman's and church work. Two sons are engaged in ranching in the Edmonton country.
